# INTERVIEW INTELLIGENCE TOOLKIT

A practical system from research to interview to digital content

**8 reusable forms | 4 stages | 1 repeatable workflow**

**Research → Prepare → Interview → Analyse → Build → Publish**

# How to use this toolkit

• Use Forms 1–2 to collect information and research the interviewee and their profession.

• Use Form 3 to build a focused question sequence. Adapt the questions to the guest; do not ask every prompt mechanically.

• Use Forms 4–5 during the interview to capture answers, stories, time markers and production needs.

• Use Forms 6–8 after the interview to analyse the material, prepare a private portfolio preview and plan content.

• Leave fields blank when information is unknown. Distinguish verified facts, guest-provided claims and your own analysis.

• Obtain clear permission before publishing personal details, photographs, recordings, quotations or portfolio pages.

# Workflow at a glance

| Stage | Forms | Outcome |
|---|---|---|
| Pre-interview | 1–2 | Know the person and profession |
| Preparation | 3 | Plan the conversation |
| During | 4–5 | Capture answers and content moments |
| Post-interview | 6–8 | Analyse, create portfolio and plan publication |
